

# CONNECT

Cloud Managed. Enterprise Connectivity. Unlimited Potential.

The Aerohive Connect solution enables robust Wi-Fi – for any budget.

**Connect** provides unified, cloud-managed connectivity built on Aerohive's unique cooperative control Wi-Fi focused on optimizing speed and resilience. Connect is centrally managed from the cloud, allowing for simple, fast, and powerful management.

## KEY BENEFITS

- Self-organizing and self-healing access with the best balance of coverage, capacity, and performance
- Harness the power of the cloud for centralized management, visibility, and troubleshooting
- Interactive, forum-based support with optional service upgrades

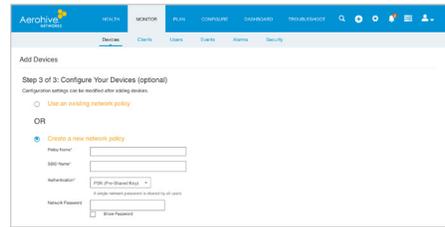

## FEATURES

### PLAN

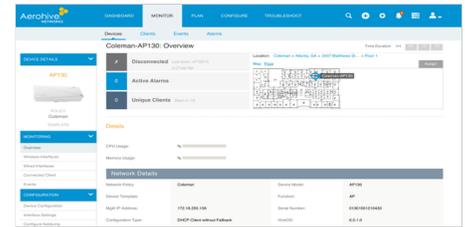

Integrated Planning Tool streamlines the planning & deployment process from start to finish

### CONFIGURE

Simple, intuitive workflow to configure an enterprise policy in fewer than five clicks!

### DEPLOY

Deploy policies and manage 1 to 100,000s of devices from a single centralized interface

### CHOOSE

Select the Aerohive access points and switches that suit your environment:

**Fast, Secure, Adaptable Wi-Fi**  
A complete portfolio of access points from entry level 802.11ac to next-generation dual 5 GHz Wave 2 connectivity

**High Performance Switches**  
A unified wired and wireless experience with cloud-managed high capacity access switches

### SUPPORT

The Connect Community is an interactive forum filled with experts from across the globe, operated by the industry's highest ranking support team for customer satisfaction.

Need additional levels of network assurance? Enhance your support coverage with a suite of essential client services.

For complete support terms go to [www.aerohive.com/support](http://www.aerohive.com/support).
