

WALLIX Trustelem

Identity and Access Management - IDaaS

A service platform to unify, secure and simplify user access to their applications.

" WALLIX Trustelem facilitates centralized authentication on a large number of applications, and offers efficient administrative tools completely integrated into our IT system. WALLIX supported us with commitment and competence."

**Thierry Fau / CISO & Internal IT architect
at ALMAVIA**

BLOCK ATTACKS AND PROTECT STRATEGIC ASSETS

- > Reduce the attack surface by strengthening identity and access security (Phishing, Social Engineering, etc.)
 - > Centralized implementation of access control policies on user groups
 - > Compliance with security regulations
-

INCREASE THE EFFICIENCY OF IT TEAMS

- > Simplified management and automatic access to applications or third parties (authentication workflows)
 - > Cost optimization by reducing human intervention and associated risk of errors
-

IMPROVE USER EXPERIENCE

- > Easier connection to applications through a custom dashboard
 - > Secure reset in case of password loss on a self-service portal
 - > Appropriate and secure authentication according to usage and the type of application used
-

Rely on a trusted partner

Keep control over your identities and data! The WALLIX Trustelem platform is hosted and operated by a trusted European cloud provider. Your data sovereignty and security are essential to ensure quality of service and to protect your company's assets.

About WALLIX

WALLIX solutions protect against cyber threats, theft and data leaks linked to stolen credentials and misappropriated privileges. They are distributed by a network of more than 170 resellers and integrators worldwide. Listed on Euronext, WALLIX supports more than 1,000 organizations in securing their digital future.
